List Compact

!	Object name	Constellation	Observer	Instrument	Date	My LO instrument	My LO date	(*)
+ !	NGC 436	Cassiopeia	Wim De Meester	80mm refractor (80 mm)	04/09/2015			D AO
	H400 15 OCL 320 Mel 6 Cr 11	Translate Dit is een soort Hyaden-achtig hoopje met op de plek van Aldebaran een dubbelster. Er staan meer losse sterren in de achtergrond dan in de echte Hyaden. Aan de punt staan twee tamelijk heldere sterren.				Translate		
+ !	NGC 908	Cetus	Wim De Meester	80mm refractor (80 mm)	24/12/2014			D AO
	H400 37 ESO 545-11	Translate NGC 908 is een langwerpige vlek ten zuiden van 4 zwakke sterren. Aan de zuid-oost kant staat een zwakke ster. Het is een langwerpige vlek met een vage kern en verder geen details. Ten noorden ervan zie ik ook NGC 907, NGC 899 en IC 223. NGC 899 is het makkelijkst te zien. Het is een vage vlek. NGC 907 is wat moeilijker en IC 223 ziet eruit als een even grote vlek als NGC 899 maar heel zwak en rond.				Translate		
+ !	NGC 6818	Sagittarius	Wim De Meester	Dobson Lightbridge (304 mm)	21/08/2014	Dobson Lightbridge (304 mm)	21/08/2014	D AO MO LO
	H400 360 PK 025-17.01 Little Gem	Translate 2 breite helle Streifen, oberer Streifen größer, zwischen den Streifen quer dazu kleiner dunkler Streifen oder Kreis, Randbereich des Nebels schwächer				Translate 2 breite helle Streifen, oberer Streifen größer, zwischen den Streifen quer dazu kleiner dunkler Streifen oder Kreis, Randbereich des Nebels schwächer		
+ !	Pal 11	Aquila	Wim De Meester	Dobson Lightbridge (304 mm)	21/08/2014	Dobson Lightbridge (304 mm)	21/08/2014	D AO MO LO
		Translate Mitbeobachter Andreas ebenfalls unsicher, ob das Objekt zu erkennen war Zirren in der Himmelsregion				Translate Mitbeobachter Andreas ebenfalls unsicher, ob das Objekt zu erkennen war Zirren in der Himmelsregion

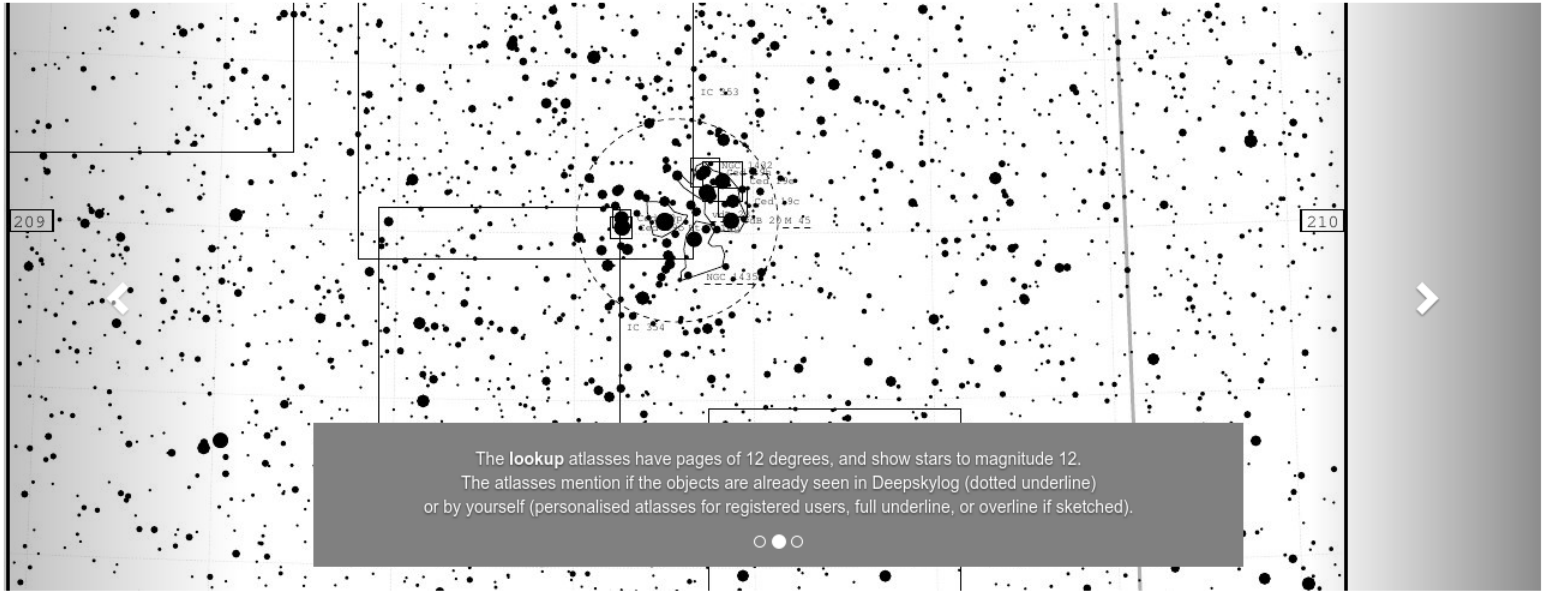
DeepskyLog atlasses



General Atlasses / Personalised Atlasses

You can either go for general atlasses, or (if you are a registered user) personalised atlasses.
- General atlasses are precompiled and are ready to download as one big pdf file.
- Personalised atlasses are generated, page per page, for you in pdf format.

Personalised atlasses take some time (one page) or much more time (complete atlas) to generate and you will have to use some software to put the pages together yourself for the complete atlas.

First choose your page layout
